## WELCOME TO PIECO GROUP

Founded in 1983, Pieco Group is being acknowledged as one of the most respected name in the field of Electrical Equipment and Engineering Services. We are one of the leading trunkey Electrical & ELV Contractors, Manufacturer of LT Panels & Medical Isolation Panels.

### Vision

#### WINNING THROUGH QUALITY

Everyone knows the better product or service will win in market place. The search to make product and service better leads to quality. And that's why we have this mission of WINNING

THROUGH QUALITY. We strive for the very best in the brains and the works, through our dedicated team of young and energetic professionals and managers with a strong industry experience in the backup.

### Policy

Today, more than ever, new technologies and processes are shaping the way virtually every industry does business. We at Pieco continue to develop innovative products and services to help our customers save valuable time make the most of

their machines and resources and boost their bottom line. This solution-oriented approach has helped us become the one of the leading contractors, manufacturers and suppliers .

### Objectives

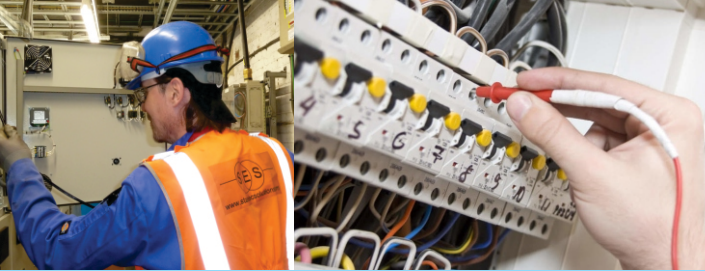

Our Objective is to add value to our clients by making available a broad range of mission-critical, cost-effective solution. To achieve Quality Service, we constantly delight our clients and exceed our clients' expectations. It starts with our associates' initial contact with a prospect and extends

to product quality, client responsiveness and satisfaction. At Pieco we view Customer Satisfaction as our ultimate, overriding goal in everything we do. The closer we get to provide Quality Service, the higher we raise the standard for achieving it.

# ELECTRICAL CONTRACTING SERVICES

## ELECTRICAL CONTRACTING SERVICES

PIECO India Engg Company Pvt. Ltd is the electrical service provider company of Pieco Group having valid electrical contractor license and had executed various electrical works. The company is working with clients in Govt, Public, Private and Corporate Enterprises. The company is providing following type of Services.

**INTERNAL ELECTRIFICATION**

**EXTERNAL ELECTRIFICATION**

**SUB STATION UP TO 132 KV**

## LT PANELS

LT Panel is an electrical distribution board that receives power from generator or transformer and distributes the same to various electronic devices and distribution boards. Pieco offer LT panels that are engineered using high grade raw material to ensure durability and flawless in the end product. Our LT panel is a perfect example of excellence & performance & suitable for high operational voltage and distribution system.

**Our L.T. Panel of 3000 Amps and TPN Bus Duct of 3200 Amps are certified by CPRI, Bhopal**

*L.T. Panel and Bus Duct have been tested for Short Time Current of 50.0 KA rms for 1 Sec. with initial peak of 105 KA.*

### PRODUCT RANGE

- Power Control Centers
- Motor Control Centers
- Distribution Boards
- AMF Panels
- Relay control Panels
- Synchronizing Panels
- Power Factor Panels
- Air-Conditioning Panels
- PLC Panels
- MIMIC Panels
- Bus Duct & Rising Main
- Fire And Pumps Panels
- Isolation Panels for OT's
- Feeder Pillar

### SALIENT FEATURES

- Bolted/welded sheet steel structure of sturdy construction
- Free standing, floor/wall mounting type
- Dust & vermin proof
- Chemical treatment of panel body for removal of grease dusts and rust
- Easily extensible on either side
- Top or bottom cable/bus duct entry as per requirement
- Accessibility for maintenance
- Maximum safety features as per Indian standards
- Wide choice as per requirement

# MEDICAL ISOLATION PANEL

## MEDICAL ISOLATION PANEL

PIECO has been manufacturing ISOLATION PANEL for hospital use since 1992. Our isolation panels are capable of detecting any combination of dynamic, resistive and/or capacitance faults, including balanced, unbalanced, and hybrid faults.

SAVING LIVES

### SCENARIO

Till date in many of the present working operational electrical system of O.T, ICU, ICCU it was not possible to read the electrical leakage's from the medical equipment's and fittings which is required to treat the patient in these sensitive wards. These electrical leakages are very harmful to the patient and to the expensive machinery.

The use of an Isolated Electric Power Supply System involves interposition of an isolation transformer between outside current and the electric outlets where patient monitoring devices are to be plugged in and the Leakage Monitoring has to be

done. According to NPFA provision of an isolation Panel is mandatory.

Pieco has developed a system, which detects the leakages in the electrical systems of O.T, ICU, ICCU. The permissible leakage while treating the patient is 5 mille Amps (According to International standards) and beyond this it is hazardous. Our system continuously monitors the electrical leakage if it is there and will indicate (audio & visual). The person in-charge can take precaution and avert any accident.

### USE OF ISOLATION PANELS

The increased use of electronic diagnostic and treatment equipment, and the corresponding increase in electrical hazards, has resulted in the use of isolated ungrounded systems in new areas of the hospital. Isolating systems are now commonly used for protection against electrical shock in many areas, among them:

- OT's
- ICU
- ICCU
- NICU
- MICU
- Post OP
- Emergency
- Gynic OT's
- Dialysis units
- Other Sensitive Wards

# MEDICAL ISOLATION PANEL

## WHAT IS ELECTRICAL HAZARDS

The major electrical accidents are due to faulty equipment and wiring. Electrical accidents fall into these categories:

- Fires
- Burns
- Shock

Electrical shock is produced by current, not voltage. It is not the amount of voltage a person is exposed to, but rather the amount of current transmitted through the person's body that determines the intensity of a shock. The human body acts as a large resistor to current flow. The threshold of perception for an average adult is 1milliampere (mA). This amount of current will produce a slight tingling feeling through the fingertips. Between 10 and 20 mA, the person experiences muscle contractions and finds it more difficult to release his or her hand from an electrode. An externally applied current of 50 mA causes pain, possibly fainting and exhaustion.

## LEAKAGE CURRENT

Electric equipment operating in the patient vicinity, even though operating perfectly, may still be hazardous to the patient. This is because every piece of electrical equipment produces a leakage current.

There are no perfect electrical systems or infallible equipment to eliminate hospital electrical accidents.

However careful planning on the part of the consulting engineer, architect, contractor and hospital personnel can reduce electrical hazards to nearly zero

## DAMAGES DUE TO ELECTRICAL LEAKAGES

- HEART FAILURE
- SKIN TISSUES RUPTURING/BURNING
- HARMING MASTER CELLS
- HARMING BONE MARROW SYSTEM
- BURNING DUE TO COTERIE
- MEDICAL EQUIPMENT DAMAGING
- ELECTROCUTION

## LINE ISOLATION MONITOR

Dependable operation of the essential electrical system is a must in operating theatres and intensive care areas where a single fault or a loss of power may be fatal. As surely as patients undergoing surgery rely on physicians, so do the physicians count on the reliability of the electrical system. The availability of a secure isolated power supply and clear information about the fault status of medical equipment are of paramount importance in achieving this goal. At the heart of the electrical system is the Line Isolation monitor ( LIM), which continuously monitors the system and connected medical apparatus for abnormalities that could lead to hazardous ground leakage currents for the patient and staff.

ISOLATION TRANSFORMER

## STANDARD FOR HEALTH CARE FACILITIES

- NFPA 70- National Electric Code, Article 517
- NFPA 99- Health Care Facilities
- UL 1022- Line Isolation Monitors
- UL 1047-Isolated Power System Distribution Equipment
- UL 50- Enclosures for Electrical Equipments

## LOW VOLTAGE SYSTEM CONTRACTING

Pieco offers a reliable, high-quality Building Management System, Security and Fire Safety products for business houses, market development and channel development. We install, integrate and maintain the systems that help keep your facility safe, secure, comfortable, productive and energy efficient. Our solutions are generated not only keeping specific security, safety or comfort need in mind, but also recognizing the various operational, functional and maintenance requirements.

### INTELLIGENT BUILDING MANAGEMENT SYSTEM

We offer a scalable range of building management, intelligent building solutions and services from individual subsystems to fully integrated intelligent buildings.

- Networked Access Control
- CCTV Integration
- Automation
- Alarm Integration

### CCTV & SECURITY SYSTEM

Our field-proven integration methodology provide reliable perimeter detection options for security sensitive applications and harsh exterior environments.

- IP Based CCTV
- Analog CCTV

### FIRE ALARM SYSTEM

We offer broad portfolio of products and systems for accurate, reliable fire detection and notification. Our solutions provide precise, life-saving information at critical moments and are relied upon to help protect office buildings, warehouses, educational facilities, retail stores and many other types of facilities.

- Fire Detection and Alarm System (Conventional)
- Fire Detection and Alarm System (Analogue Addressable)
- Hydrant Wet Riser and Water Sprinkler System
- Automatic Fire Extinguishing System (Gas based FM200 & NOVEC)

### ACCESS CONTROL SYSTEM

Pieco offers customers smarter ways to protect staff and property with their integrated Access Control Solutions. Integrating state-of-the-art video elements, we installs, maintains and upgrades standalone systems, networked enterprise-wide systems or hosted systems to offer a full range of customized Access Control Solutions.

- Proximity Technology
- Smart Card Technology
- Biometric Technology

# LOW VOLTAGE SYSTEM CONTRACTING

## INFORMATION COMMUNICATION TECHNOLOGY

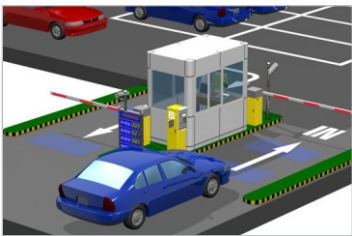

Pieco's Information & Communication Technologies practice provides a complete solutions to its various clients. The services includes the following.

- Mid Size Servers
- Switches
- Computers

## IP TELEPHONY SYSTEM

Pieco provides IP telephony system which enable users to easily communicate in any workspace using any media, device or operating system. We offers a comprehensive line of IP desktop devices-everything from affordable, entry-level phones to sophisticated IP phones and devices with cordless handsets, conference units, and attendant consoles.

## PARKING MANAGEMENT SYSTEM

Our parking management system delivers intelligent parking management systems that not only optimize your parking programs but also deliver convenient solutions for drivers. From smart parking integration to violation processing to meter operations which help you reduce costs and street congestion.

## INTRUDER ALARM SYSTEM

We protect your business with a fully integrated intruder alarm system. With a wide range of intruder alarms and systems Pieco can help you to ensure your premises, stock or equipment are protected 24 /7. From window sensors and switches to the latest movement and vibration detection technology we will find the ideal blend of equipment to help your business remain secure.

## WATER & GAS LEAKAGE DETECTION SYSTEM

Pieco have an extensive range of water leak detectors and gas leak detection systems. We are specialists in providing proven systems for a wide range of different situations from simple flow monitors for domestic use to complex multi-zone gas leak prevention systems in high risk areas.

## HVAC SOLUTIONS

Pieco offers comprehensive services within HVAC (Heat, Ventilation, Air Conditioning) from studies to EPCIC, especially focused on providing customer documentation. For efficient project execution we have our own in-house fabrication workshop and established close relations with all leading suppliers e.g. air units, fans, skids, cooling machines, automatic control systems etc.

### WE OFFERS THE FOLLOWING SERVICES

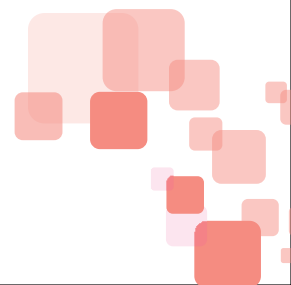

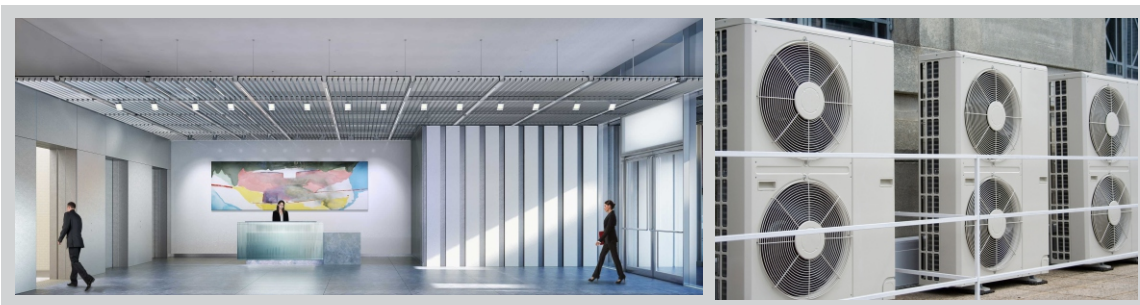

- Engineering
- Leadership and project management
- Personnel - both supervisors and operators
- Design
- Studies
- Product and equipment
- Installation
- Mechanical completion
- Commissioning
- Documentation

### FULL SERVICE HVAC CONTRACTOR

Our mission is to design, build, and maintain high quality and efficient HVAC systems; attract and develop our industry's next talent; and build enduring business relationships.

As a full service mechanical contractor, Western Allied provides a complete solution for our clients. We provide high quality mechanical systems complete with DDC controls; precisely designed to project requirements. Our seasoned service personnel, coupled with an experienced engineering staff, are able to troubleshoot and solve system problems quickly and efficiently.

# TURNKEY HVAC SOLUTIONS

## WE PROVIDE CENTRALIZED AIR CONDITIONING SYSTEMS LIKE CHILLERS, VRF, VAM ETC.

Peico provides HVAC Boiler and Chiller parts, repair, service to commercial and industrial customers. Our goal is to help create and maintain healthy, productive and efficient working and living environments so our customers receive the maximum benefit from their facilities.

With more than 200 service personnel, Peico is well equipped to handle all repair and maintenance challenges. We offers the convenience of one company dedicated to delivering exceptional service and value to our customers every day.

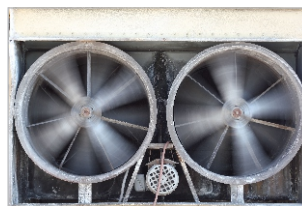

### HIGH SIDE

- Chiller
- Cooling Towers
- Pumps

### LOW SIDE

- Air handling units & ventilation units • Air distribution system • Piping & Insulation
- Dehumidifier • Energy recovery wheels • Air washer

# TURNKEY HVAC SOLUTIONS

## OFFERING WIDE RANGE OF PRODUCTS

Our Experience and proven organizational skills enable us to successfully implement a wide range of project services in

- Cleanroom air conditioning & validation
- Refrigeration & cold storage systems
- Evaporative cooling systems
- Industrial Ventilation
- Semiconductors air conditioning & validation

## WE PROVIDE HVAC SOLUTIONS FOR PHARMACEUTICALS PROJECTS SUCH AS

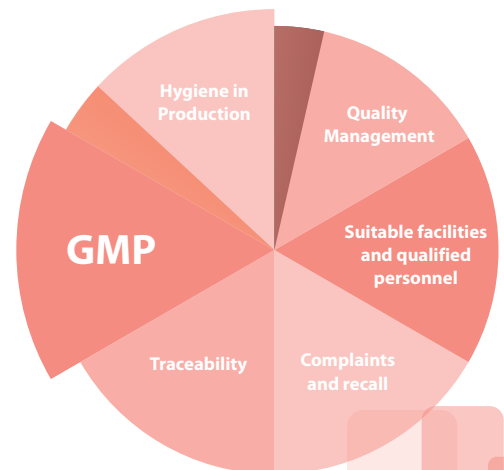

- General
- Antibiotic
- Penicillin
- Oncology
- Insulin
- Cephalosporin
- High potent drugs for Oral Parenteral
- Topical Sections
- Milk food projects
- Soft drink & Beverage projects

## GMP (GOOD MANUFACTURING PRACTICE) -DOCUMENTATION

Pieco covers GMP system for ensuring that products are consistently produced and controlled according to quality standards. It is designed to minimize the risks involved in any pharmaceutical production that cannot be eliminated through testing the final product.

GMP covers all aspects of production from the starting materials, premises and equipment to the training and personal hygiene of staff. Detailed, written procedures are essential for each process that could affect the quality of the finished product. There must be systems to provide documented proof that correct procedures are consistently followed at each step in the manufacturing process - every time a product is made.

## TURNKEY CLEAN ROOM SOLUTIONS

Pieco is specialize in providing clean-room systems for the pharmaceutical, hospitals & research laboratories. Whether you are adding on, modifying an existing facility, or constructing a new facility, our solutions offers materials to suit your specific application. Our clean room solutions can be integrated with a wide range of new or existing systems to coordinate any clean room facility or manufacturing environment. Simplified construction methods and our progressive/ non-progressive system will help minimise overall construction time.

### OUR RANGE OF PRODUCTS INCLUDES

- Wall Panels
- Ceiling Panels
- View Panels
- Risers Panels
- Clean Room Doors
- Fire Doors

### KEY FEATURES OF PIECO CLEAN ROOM SERVICES

- Many years of experience
- All services from one source
- Your requirements define our services
- Individual systems and special solutions
- Single components and entire systems from our in-house production

### THE PROCESS

The extensive experience in the sector of Clean Rooms and Controlled Environments has provided Pieco a solid technical knowledge and an extensive collaborators' network, partners and experts perfectly integrated, with the skills and experience to cover all the fields involved in the development of these type of projects, according to regulation and national and international standards.

#### • CONCEPTUAL DESIGN

Required to start a future project as it will define the processes to develop their requirements and needs

#### • BASIC & DETAILED ENGINEERING

The engineering phase will define all construction aspects of the project, its facilities and equipment.

# TURNKEY CLEAN ROOM SOLUTIONS

- **PROJECT MANAGEMENT**

Proper Project Management allows to handle the project as a compact unit that integrates all parts under a single management.

- **CLEAN ROOM CONSTRUCTION**

Clean room architecture system, auxiliary equipment, air treatment, critical fluids, industrial utilities according to established specifications.

- **COMMISSIONING & VALIDATION**

In order to ensure that all processes, equipment and facilities operate according to the specifications.

- **MAINTENANCE AND AFTER-SALES SERVICE**

Essential for the correct operation of the installation, its proper performance, reliability and durability over time.

## PANEL TECHNICAL

Panel Width	Standard Dimension : 1200mm, 600mm, 400mm
Panel Thickness	30mm, 50mm, 60mm, 100mm
Panel Height	Up to 6000mm with provision to have stacked panels for higher levels
Insulation	PUF / Honeycomb/ Rockwool/ Minera Wool
Panel Weight/ Sqmtr	Depends upon the specification and thickness of panel
MOC- surface	Powder coated GI/ Prepainted GI/ Stainless steel, HPL

## VIEW PANEL-TECHNICAL

Panel Width	Standard Dimension : 1200mm	
Panel Thickness	50mm, 60mm, 80mm, 100mm	
Panel Height	Up to 6000mm with provision to have stacked panels for higher levels	
Insulation	For Concealed view panels with PUF/PUR/Honeycomb/ Rockwool/ Mineral wool	
Glass MOC	Toughened glass (5mm/ 6mm) with black border both sides flush	Float galss (5mm/ 6mm) with black border both sides flush
MOC- surface	Powder coated GI/ Prepainted GI/ Stainless steel, HPL	

# TURNKEY CLEAN ROOM SOLUTIONS

## Risers Panel

Panel Width	Standard Dimension : 1200mm
Panel Thickness	80mm, 100mm
Cut out size	Can vary as per HVAC requirement
Panel Height	Up to 6000mm with provision to have stacked panels for higher levels
Insulation	PUF/PUR/ Honeycomb/ Rockwool/ Mineral wool
MOC- Surface	Powder coated GI/ Prepainted GI/ Stainless Steel, HPL
Accessories	Grill with capsule perforation, Extras: Bottom operate able damper, pre filter

## Door Technical

Frame Width	50mm, 60mm, 80mm, 100mm		
Shutter Thickness	46mm		
Colour of choice			
Insulation	PUF/PUR/ Honeycomb/ Rockwool/ Mineral wool		
ACCESSORIES			
SS 304 ball bearing hinges	Dorma or equivalent door closure	SS 304 tower bolt	
Dead lock with both side key	SS 304 Handle	Automatic door drop seal	
SS 304 push plate	SS 304 kick plate	Vision glass (5mm) both side flush	

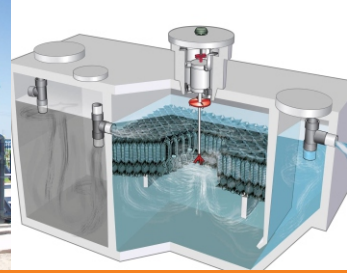

## Fire Door Technical

Frame Width	50mm, 60mm, 80mm, 100mm		
Shutter Thickness	44mm thick made of sheet thickness 1mm	Frame Specification	1.5mm thick single or double rebate
Colour			
Insulation	Honeycomb/ Rockwool		
Test Standards	2 hrs and 4 hrs fire rated metal door and tested to BS 476 part 22 from warrington (UK) and CBRI, Roorkee (Indian) Fire Test Agency)		
Finish	Doors are coated with pure polyester/ epoxy polyester powder achieving a coating thickness of 60-80 microns		
Glazing	6mm thick clear fire rated glass/ wired glass		

## PLUMBING & FIRE FIGHTING

Pieco is pleased to introduce itself one of the leading Contractors for Sanitary/Plumbing and Fire Fighting System for Hotels, Hospitals, Industries and Multi-Storyed Buildings including Commercial Houses as well as residential Flats. We are having proper setup equipped with professional having wide range of working experience in the field of Sanitary/Plumbing and Fire Fighting System.

### Plumbing Contracts

We are engaged in executing various types of Plumbing Work. Backed by a team of experienced plumbers, we have been rendering unmatched services to the clients. Starting right from the fabrication, testing, installation and servicing, we undertake all the tasks involved in plumbing work. Also, we make sure that the work executed by us avoids any kind of problem or chaos in future.

### Our Plumbing work include the following :

- Hydro Pneumatic System
- Sewage Treatment Plants
- Rainwater Harvesting
- Water Treatment Plants
- Fire Fighting Works

### HYDRO PNEUMATIC SYSTEM

Pieco's Hydropneumatic Systems are widely recognized by engineers, contractors and system users as the most dependable, predictable, safest and cost efficient form of surge protection available protection means savings. Our experience and expertise generates high-performance designs and system improving results.

### SEWAGE TREATMENT PLANT

Our professionals team has expertise to deliver customized solutions of Sewage Treatment Plant. We have a variety of sewage water treatment alternatives that start from a small Pre-fabricated Plant to Large size Sewage Treatment Plant. In line with our dedicated approach towards the principle of sustainable development with appropriate technology, we offer variety of treatment alternatives in the field of sewage treatment.

# PLUMBING & FIRE FIGHTING SOLUTIONS

## BATHROOM & TOILET BATH FITTING

PIECO aim to provide you with a professional and cost effective solution to all your plumbing requirements.

We will help you design your bathroom/toilets to your specific requirements. Our qualified plumbing engineer will advise on the best fittings, taps, and showers, to use to maximise the plumbing installation you have ie (combi, pressurised, or gravity). All work will be included, from stripping out the old suit to the completion of your custom installation.

## WATER TREATMENT PLANTS

PIECO Specialists in water, wastewater & waste water recycling system, The Company had a complete range of technologies, products and services. if you are planning your building with water conservation in mind – part of an overall water strategy that may also include dual-flush toilets, low-flow faucets, waterless urinals, and native landscaping.

## FIRE FIGHTING SOLUTIONS

Fire fighting is an act of extinguishing fire. Fireraman fights fires to prevent destruction of various aspects of life, property and the environment. Fire fighting is a dramatic technical skill that requires professionals who have years of training and education to become proficient in his field. Any time fire can spread rapidly and endanger many lives but however with modern firefighting techniques which we are having we can help in u in fighting the fire. To prevent fires from starting, a fire fighter's duties include public education and conducting fire inspections which we can provide and help you in fire fighting.

Our expertise also lies in undertaking contract for installation of various types of fire fighting systems such as fire security system, hydrant system, fire alarm system, gas suppression system etc. We are committed to offer quality and customer-oriented services to live up to the expectations of our esteemed clients. This ensures that clients keep returning to us for needs.

## PUMP ROOM INSTALLATIONS

We provide prompt and effective Pump Room Installation and repair services with booster pump sets, water tank and pumping systems. Precision designed, our range comprises all the advanced technical features in modern tanker design and operation. Our basement pump rooms are the repository of all water related features to keep the building water supplied at all times.

# TURNKEY INTERIOR DESIGNING SOLUTIONS

## INTERIOR DESIGNING

Pieco offer a variety of interior design services ranging from project management to civil construction works on turnkey basis. We provide quality interior design services for all types of business spaces.

We offer Building construction and complete interiors designing services – including carpentry-wooden works, electrical-wiring-fitting, plumbing works, false ceiling designs, all kinds of flooring, HVAC, Fire Safety System, Civil Construction & Building Construction.

## HEALTHCARE & HOSPITAL INTERIOR DESIGN

Demand for interior design services from the healthcare industry is expected to be high because of an anticipated increase in demand for facilities that will accommodate the aging population. Designers will be needed to make these facilities as comfortable and homelike as possible for patients.

The manipulation of colour in the Hospitals, Super Speciality Hospitals, Clinics or Nursing homes, Diagnostics Centres, Pathological Centres, OPD, Wards, OT, ICU, Intensive Care Units, Doctor's Consultation Room, Consultant's Chambers, Patient's sitting or waiting area should be sophisticated and intelligent.

# TURNKEY INTERIOR DESIGNING SOLUTIONS

## WE ARE IN DEMAND

Hospitals owners are increasingly using our services when they plan new additions, remodel aging OPD or Ward Block, and update the general decor of their hospitals, Nursing homes or Private Clinics. Many hospitals owners also have requested design help in creating year-round outdoor patient spaces and patient care units.
